Reply to Office Action Dated: June 26, 2007

Amendments to the Claims:

Please amend the claims as follows:

This listing of the claims will replace all prior versions, and listings of the claims in this

application.

1. (Currently amended) A method of creating a view (V) on a computer screen (3), the

method comprising the steps of:

the computer (2)-receiving a request from a user to create a view, the

request comprising a location indication, wherein the location indication comprises a

point on the screen indicated by the user,

the computer (2)-determining, on the basis of the location indication, both

a view location and view dimensions, and

the computer (2)-displaying a view (V)-having said view location and said

view dimensions.

2. (Cancelled)

3. (Currently amended) The method according to claim 21, wherein the view has a

center which substantially coincides with the point on the screen indicated by the user.

4. (Previously presented) The method according to claim 1, wherein the view

dimensions are as large as possible.

Amdt. Dated: September 14, 2007

5. (Currently amended) The method according to claim 1, wherein the computer

provides view activation points (P) on the screen, each view activation point

corresponding with a view having predetermined view dimensions.

6. (Currently amended) The method according to claim 5, wherein the computer

provides at least two different types of view activation points-(P₄, P₂), one type

corresponding with views having a fixed size.

7. (Previously presented) A device programmed for carrying out the method according

to claim 1.

8. (Currently amended) The device according to claim 7 which is a desktop computer

(1), a laptop computer, a palmtop computer, a PDA or an electronic organizer.

9. (Currently amended) A software product for carrying computer readable storage

medium including a computer program that carries out the method according to claim 1.

10. (Currently amended) An information carrier, such as a CD-ROM, provided with a

software product according to claim 7.

11. (New) The method of claim 1 wherein the point on the screen comprises a software

button.

12. (New) A computer implemented method of presenting a view on a computer screen,

the method comprising:

presenting a plurality of view presentation locations on the computer

screen;

receiving a request from a user to present a first view at a first view

presentation location;

determining, on the basis of the location of the first view presentation

location, a dimension of the first view;

presenting the first view at the first view presentation location, wherein the

first view includes the determined first view dimension.

13. (New) The method of claim 12 wherein the view presentation locations comprise

software buttons.

14. (New) The method of claim 12 wherein the view presentation locations are

presented in a plurality of rows.

15. (New) The method of claim 14 wherein alternating rows are staggered.

16. (New) The method of claim 12 wherein the first view includes a center and

presenting the first view includes positioning the center at a location that substantially

coincides with the first view presentation location.

17. (New) The method of claim 12 including determining the dimension of the first

view on the basis of the location of the first view presentation location in relation to an

edge of the screen.

18. (New) The method of claim 12 including:

receiving a request from the user to present a second view at a second

view presentation location:

determining, on the basis of the location of second view presentation

location in relation to an edge of the first view, a dimension of the second view;

presenting the second view presentation location at the second view

presentation location, wherein the second view includes the second view dimension.

19. (New) The method of claim 12 wherein determining the dimension of the first view

includes selecting one of a first predetermined dimension and a second predetermined

dimension.
